SUMMARY

Final-year B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience developing AI-powered applications, predictive models, and full-stack software systems. Skilled in Python, Machine Learning, FastAPI, React.js, Node.js, XGBoost, TensorFlow, and PostgreSQL, with experience building intelligent solutions for credit risk assessment, business analytics, and time-series forecasting. Strong foundation in Data Structures, Object-Oriented Programming, DBMS, Operating Systems, and software engineering, complemented by a practical approach to designing scalable, data-driven applications and solving real-world engineering problems.

SKILLS

Languages: Python, JavaScript, C, Java, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Microservices Architecture, REST API Development

Frontend: React.js, Component-based UI, JavaScript, HTML5, CSS3, State Management, REST API Integration

Databases: PostgreSQL, MongoDB, MySQL, Database Design, Query Optimization

Tools & Platforms: Git, GitHub, VS Code, Docker, Render, Netlify

EDUCATION

Jain (Deemed-to-be) University

Bangalore, Karnataka

Bachelors of Technology in Computer Science and Engineering (AIML)

2023-2027

CGPA: 7.5

PROJECTS

FinScope – Autonomous FinTech COO Agent :

January 2026

- Built an autonomous executive intelligence platform that monitors fintech KPIs, forecasts cash flow, predicts customer churn, and detects fraud trends. Designed a multi-agent architecture using LangGraph to generate strategic business recommendations and executive reports.
- Skills & Tools: React.js, TypeScript, FastAPI, PostgreSQL, LangGraph, XGBoost, Prophet, Scikit-learn, Pandas, NumPy, Recharts, Machine Learning, Time Series Forecasting, Customer Churn Prediction, Fraud Detection, Business Intelligence, Agentic AI, REST APIs.

Loan Secure AI :

November 2025

- Developed an AI-powered loan risk assessment platform that predicts borrower default probability using XGBoost and explainable AI techniques to support lending decisions.
- Designed a LangGraph-based multi-agent workflow for borrower profiling, risk scoring, recovery strategy generation, and personalized repayment recommendations.
- Built the backend using FastAPI and PostgreSQL, leveraging SHAP, Scikit-learn, Pandas, and NumPy for feature engineering, model interpretation, and end-to-end machine learning workflows.

Mutual Fund Analytics Platform :

March 2026

- Built an automated ETL pipeline to extract, clean, and integrate 10 diverse datasets into a highly scalable Star Schema database optimized for analytical queries.
- Developed a multi-page, highly interactive Streamlit web application with a premium UI/UX design, featuring live data fetching, advanced risk-return visualizations, and automated email reporting for stakeholders.
- Skills and Tools : Python (Pandas, NumPy), SQL, SQLite3, Power BI, Matplotlib, Data Modeling (Star Schema), ETL automation, and Financial Analytics.

CodeGuard AI: Enterprise Agentic PR review Platform :

May 2026

- Developed an enterprise-grade GitHub Pull Request review platform that automatically analyzes code quality, security vulnerabilities, and performance bottlenecks. Orchestrated a multi-agent workflow using LangGraph featuring 8 specialized AI agents to generate structured reviews, architecture compliance checks, and automated code patches.
- Designed a context-aware Retrieval-Augmented Generation (RAG) pipeline integrating team coding standards, and built an ensemble machine learning risk service (XGBoost & LightGBM) to predict merge risks and bug probabilities before deployment.
- Skills & Tools: Python, Next.js, Node.js, LangGraph, XGBoost, LightGBM, Qdrant (Vector DB), PostgreSQL, Redis, Docker, Kubernetes, Prometheus, Grafana, Agentic AI, Retrieval-Augmented Generation (RAG), Machine Learning, REST APIs.

ACHIEVEMENTS & CERTIFICATIONS

- Introduction to Computers and operating systems and security – Microsoft
- Probability & Statistics for Machine Learning & Data Science - Deeplearning.ai
- Prerequisites and Advanced Machine Learning for NLP – Packt
- Foundations of Data Science and Machine Learning with Python - Packt
